Art Unit: 2851

### **DETAILED ACTION**

### Specification

- 1. The disclosure is objected to because of the following informalities:
  - a. On page 1, 2<sup>nd</sup> paragraph, 4<sup>th</sup> line, the word "artifacts" is misspelled as "artefacts."

    Appropriate correction is required.

## Claim Objections

2. Claims 14-16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 14-16 are method claims which depend from apparatus claim 11. It appears that claims 14-16 should possibly depend from claim 12.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Heimbuch, et al. (US 5,448,314).

Heimbuch (US 5,448,314) discloses all the structure set forth in the claims.

Heimbuch (US 5,448,314) discloses "... an input (Fig. 4, ref.# 27) receiving digital data

Page 3

defining image frames; and an optical modulator (Fig. 4, ref.# 26) adapted to generate a

series of images corresponding to said digital data, said images being separated by black

intervals (Fig. 7b, "blanking period") selected to induce a stroboscopic effect in the eye

of the viewer." Furthermore, any digital projector system that utilizes an optical

modulator would read on the claims. It has been held that the recitation that an element is

"adapted to" perform a function is not a positive limitation but only requires the ability to

so perform. It does not constitute a limitation in any patentable sense. In re Hutchison,

69 USPQ 138.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure:

Petrunchik, et al. (US 6,386,711) discloses a digital projector that utilizes a spatial light

modulator where the light is selectively attenuated and then projected onto a screen.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Rodney Fuller whose telephone number is (703) 306-5641. The

examiner can normally be reached on Monday through Friday from 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Russ Adams, can be reached on (703) 308-2847.
